## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6,7 & 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Barrows (US Patent 5,802,860). Barrows discloses a refrigeration system which controls sub-cooling by controlling the amount of refrigerant diverted from the condenser and based on a saturated phase change transition temperature of the refrigerant in the condenser and the liquid refrigerant temperature at the condenser output and further comprising: a refrigeration system (10), compressors (12), a condenser (14), a temperature sensor (28,30), a pressure sensor (36) and a controller (18).

### ***Allowable Subject Matter***

Claims 5 & 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
